Music Academy Ops Snapshot, as of 10/14/2026

Active Students	Monthly Revenue	Inquiry Close Rate	Cancellation Rate	Records Needing Cleanup	Makeups Not Booked
143	$28,060	34.5%	13.6%	5	15

What the data says

1. September looked like a collapse (31 lessons vs. 90 in July), but most of its lessons were never closed out. Cleaned up, Sept and Aug both hit 64.
2. Brick cancels 18% of its lessons, almost double Red Bank's 10%. 23 of Brick's cancellations came from our own instructors, not students.
3. About 1 in 3 finished inquiries becomes a student (34.5%), not 50%. 57 leads sat open for over a month, and 19 never got any response.

What I'd fix in Salesforce

1. A nightly Flow that flags lessons still marked Scheduled after their date, so they get closed out the next day instead of months later.
2. Auto-assign new inquiries with a 48-hour follow-up task, and mark leads Unresponsive automatically after 30 days with no activity.
3. Auto-create a makeup task when an instructor cancels (15 are waiting), and look into why Brick's instructors cancel so often.
